SAN ANDREAS - WIKIPEDIA

san andreas pdf

The San Andreas Fault is a continental transform fault that extends roughly 1,200 kilometers (750 mi) through California. It forms the tectonic boundary between the Pacific Plate and the North American Plate, and its motion is right-lateral strike-slip (horizontal). The fault divides into three segments, each with different characteristics and a different degree of earthquake risk.

Stop 4: Old Mission San Juan Bautista and Plaza: The layout of the Old Mission and Plaza area is typical of old Spanish community design. The Plaza is the last remaining plaza associated with missions in California. The Old Mission itself is the largest. after the first church and buildings were heavily damaged by earthquakes of October 1798 and 1803.
